ASSESSMENT

Based on specified customer requirements

Visual inspection by employee

Full load inspection

n.i.O.

REPAIR CENTRE

Special cleaning, straightening work, steel and plastic welding, replacing broken parts

CLEANING METHODS

DRY ICE CLEANING

Innovative method for abrasive-free surface cleaning without residual moisture

AIR JET CLEANING

Effective cleaning with ionised air - dirt is whirled up and extracted - prevention of recontamination

VIBRATION TECHNOLOGY

Oscillating cleaning process - to clean even hard-to-reach areas

BRUSHES

Mechanical cleaning with brushes - ideal for stubborn dirt

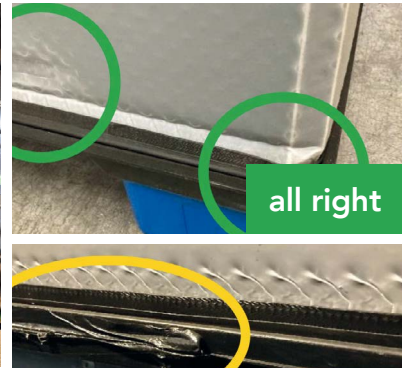

WIPING

Gentle manual cleaning with simultaneous quality control - for sensitive surfaces
